

Please Don't Forget About the Fire Hydrants!

It has been quite a while since Southern Maryland has received snowfall of this magnitude, which has resulted in huge piles of snow. In many cases, snow is unknowingly plowed and piled in front of fire hydrants.

To ensure that the fire departments have quick access to fire hydrants in the event of an emergency, the St. Mary's County Metropolitan Commission is asking its customers to clear the snow around fire hydrants located on their property.

Thank you for your assistance in this matter!
