Water and Sewer Debt Service Estimates

Please Note:

1. The information provided herein relative to the projected benefit assessment/debt service charge applicable to a specific property is based upon information provided by the Maryland Department of Planning tax database, Maryland Property View 2005.

This database provides information on parcel size, zoning, location, improved or unimproved and current usage together with the owners name and address of record. Sometimes this information is in error. Should this project go forward, the information would be confirmed the with individual property owners.

2. The formula for calculating the front footage (FF) for a residential property is:

$$FF = 0.85 \sqrt{A}$$

3. The formula for calculating the front footage (FF) for a commercial property is:

$$FF = 1.2 (0.85 \sqrt{A})$$

Where "A" is the area of property in square feet.

(1 acre = 43560 Square Feet)
