

Drinking Water Week 2024

May 5–11, 2024

The Commissioners of the St. Mary's County Metropolitan Commission recognize May 5 through May 11, 2024 as DRINKING WATER WEEK to bring awareness to young people, their families, schools and communities. We observe Drinking Water Week by recognizing that water is our most valuable natural resource.

Drinking water plays a vital role in daily life, serving an essential purpose to health, hydration and hygiene needs for the quality of life our citizens enjoy. The Commission provides nearly 1.4 billion gallons of clean, reliable and safe drinking water each year to the residents of St. Mary's County.

The work performed by the entire water sector of the Commission, including the design of capital projects, operators ensuring the safety and quality of drinking water, construction crews maintaining the infrastructure to convey high quality drinking water from its source to consumers' taps, reflects our commitment to customers and serves as a reminder that we are all stewards of the water infrastructure upon which current and future generations depend.

The quality of the drinking water provide to our customers from each of the 28 public water systems is reflected in Consumer Confidence Reports which are available on MetCom's website under the Operations draw down menu or by scanning the QR Code (at right).
