

August 2015 Bills

The August bills are calculated using the new billing structure. This means there is a Ready-To-Serve charge for accounts that have water meters. For accounts with a water meter, all water usage is billed as a water usage charge and if applicable a sewer usage charge. The bills were printed using the old format so water usage is incorrectly titled overage. Customers are not being charged an overage, but the current usage charge. We apologize for any confusion this may have caused our customers.
